

**REMARKS**

An Abstract has been added as required.

Fig. 1 was amended to change the reference numeral for the "intake duct" from 15 to 30. This corrects a typographical error because the reference numeral 15 is also used to refer to the pressure connection 15 in Fig. 2. The corresponding portion of the specification was also amended to reflect this change. Fig. 2 was amended to remove reference numeral "4", which is not referred to in the specification. Fig. 3 was amended to add reference numerals 12, 25 and 26, which were inadvertently omitted. Fig. 4 is unchanged. All these elements were described in the specification and no new matter has been added. Additional annotated sheets illustrating the changes in red are not included because these drawing changes only relate to reference numerals.

The new claims are added to conform to US practice and to eliminate multiple dependent claims. The amendment does not add any new matter, but is merely formal in nature to place the application into better form for examination. If the Examiner has any questions regarding this amendment, the Examiner is requested to contact the undersigned.

Respectfully submitted,
